

New iPad Accessories from SMARTdesks— armPad iPad arm and iDrawer iPad Security Compartment

New iPad accessories from SMARTdesks. The armPad is a secure enclosure that is mounted to a full-featured arm. Perfect for the 21st Century classroom, supporting iPad as the standard for technology in education in a post-PC world. Available with standard security or “no home button” security to restrict use of apps to the one used in class. iDrawer is both a USB power source and a storage compartment for iPad security in the classroom.

Baltimore, MD ([PRWEB](#)) June 08, 2012 -- [iPad security](#), protection and positioning convenience: The armPad by SMARTdesks is a full-featured [iPad stand arm](#) plus a security enclosure. The arm permits low profile storage, keyboard height positioning and easy screen viewing in landscape or portrait. Especially useful for institutional use or Point Of Service applications. The iPad security enclosure is available in two versions: secure containment and “no home button” access for education, or classroom applications. The latter keeps only the app used for class active, so personal use of social media can be suppressed. The enclosure is accessible only by use of a security hex wrench key, supplied with armPad.

iDrawer iPad Security Drawer is another iPad accessory for the 21st Century classroom. This padded, ventilated locking cabinet has built-in 110 VAC power and USB power. Low batteries in class are no longer an issue. The USB power cord may remain connected when the iPad is removed for use. Great for use with tablets, smartphones, Kindles, Notebooks and other small devices.

armPad and iDrawer are the latest in SMARTdesks’ offering of [iPad accessories](#), stands, and security products. SMARTdesks’ focus is to develop products to support the post-PC, 21st Century classroom environment.
