VersaPull™

This pop-up unit is so intuitive to use, and because it doesn't rely on springs or motors, there's less that can go wrong.

Installs in an 80mm hole in minutes.

Available in black or aluminum color top with coordinating panel. Simply pull the top to raise the VersaPull power data column; push down to close.

Available with two 110VAC power and two RJ45 cat 6 data connections (left); or two power and one USB power, one RJ45 cat 6 data (below).

Two Power, One USB, One RJ45 cat 6 Data

VersaPull™

Comes complete with all you see here:

Powerdata column and cap assembly inserts into 80mm hole in table top, a threaded retention ring is tightened and locked in place by installing three wood screws. The two meter long power cord installs in the base, along with data connections.
