

Villa™ Grommet Specifications

Villa Grommets are a stylish way to accessorize your work surface. Their modern design provides a simple, yet elegant solution for designers or manufacturers looking for a fresh alternative to traditional designs. Villa Grommets can be used alone or with one of our lid designs — Flush Style and Lift Style. The Flush Style comes equipped with a brush and sits flat within the work surface for a high end finish. The Lift Style provides a convenient recess to assist in opening of the lid. Both stay closed when in the vertical position for easy storage of tables. A variety of finishes are also available to compliment your work surface.
