

HorizonLine™

Classroom Laptop and Computer Tables

Featuring

US Patent No. 7,047,890
Other Patents Pending

Keep your classroom organized, secure, and ready for anything!

HorizonLine™ computer tables keep sight lines open and unobstructed—better for visual learning! The flipIT® keeps computer monitors below eye level, but at an ergonomic, natural angle for viewing with reduced eye and neck strain.

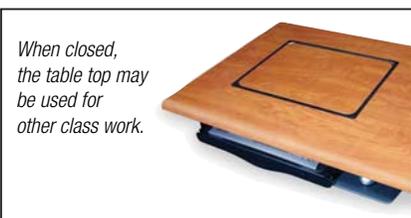

Multi-Use Classrooms

The flipIT® products hide and lock computers and laptops under the table top. When needed, they appear with a pull of the keyboard tray or release handle. When it's time to change the teaching method, or for the next class to come in and NOT use computers, access is physically denied.

SHL-362630-FIK

includes a CPU holder, and on the modesty panel, a wire management channel and 6-outlet surge protector

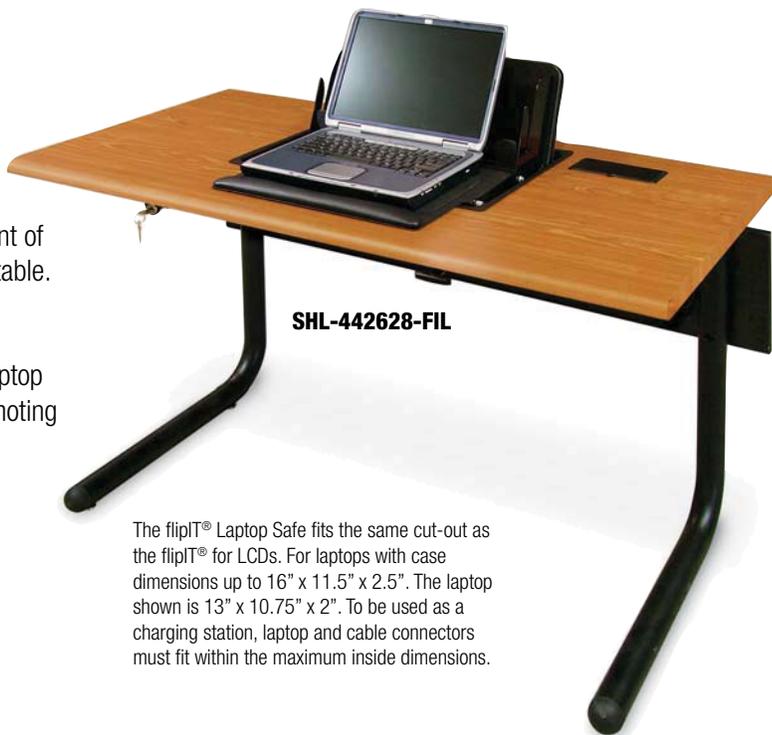

When closed, the table top may be used for other class work.

flipIT® Laptop Safe

The flipIT® Laptop Safe is a lockable charging station at the point of use. When closed, the top surface is usable as a regular study table. When open, the laptop can be freely positioned for use.

In the open position, the low profile lid is even lower than the laptop screen. This is consistent with the HorizonLine™ concept, promoting unobstructed sight lines.

SHL-442628-FIL

The flipIT® Laptop Safe fits the same cut-out as the flipIT® for LCDs. For laptops with case dimensions up to 16" x 11.5" x 2.5". The laptop shown is 13" x 10.75" x 2". To be used as a charging station, laptop and cable connectors must fit within the maximum inside dimensions.

On the modesty panel: wire management channel and 6-outlet power strip.

Classroom Laptop and Computer Tables

Specifications

Top - 1.25" thick MDF with comfort contoured front and back edges and break side edges. Fully encapsulated with surf(X)® 3D laminate top. Designed with advanced durability, surf(x) 3D Laminates provide an increased level of impact, scratch, marring, heat, and abrasion resistance compared to standard thermofoils. Their increased stain and impact resistance make them especially suited for work surfaces. Superior compared to High Performance Laminate (HPL):

Test	HPL	surf(x)®
Burnish Mar	Moderate	None/Slight
Hoffman Scratch	400g	1000g
NEMA Wear	400 cycles	1400 cycles
NEMA Cleanability	10	13-25

Modesty Panel - 0.020" thick melamine coated finish thermally fused to both sides of 19mm thick 47 lb. medium density particleboard (MDF). All exposed edges are banded in 3mm thick, color thru PVC mechanically applied under pressure and heat.

C Legs - 2" diameter tubular steel with weighted bottom, finished flat black with nylon ballnose end caps and adjustable floor glides. Locking casters optional. Mounting bracket used for attaching accessories, such as CPU holder or storage compartment.

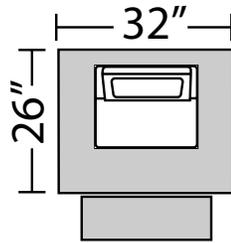

flipIT® - Model FIK-18, with keyboard/mouse tray, for LCDs up to 17.125" (435mm) case width (most 19" monitors) and optional lock. Model FIH-18, same, without keyboard, including cable release actuator handle. Model FIL-18 flipIT® Laptop Safe inside dimensions 16" x 11.5" x 2.5" maximum, including wire management secure pass-through, key lock assembly and cable actuator handle.

Power - 6 outlet, 13 AMP, power strip with 10-foot cord, attaches to modesty panel.

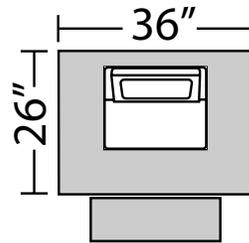

Wire Management - J channel adhered to modesty panel.

Model Numbers include dimensions: W x D x H
