Nesta™ Laptop Tables

With UL approved modular wiring

NSF-722628-VFS Double User Table
Nesta™ Laptop Tables
Nest for storage, quickly deploy using modular wiring.

General Specifications:

- Top finished in wood-grain or pattern Surf(x) 3D scratch resistant thermofoil
- Tubular, steel legs, powdercoated in silver
- Locking carpet casters
- Hinged modesty panel, matching top finish
- DaisyLink™ Modular Power
- Villa™ Power & Data Ports

Nesta™ Laptop Tables simply plug together. They fold up for easy access to cables, for easy transport through doorways and efficient storage. They fold down for roomy support of laptops in the classroom. The structure is robust, built to stand up to physically demanding, institutional use. Perfect for spaces that need to quickly change functions, or for laptop classrooms that need to move to different spaces.

Villa™ Power & Data Ports are made for the DaisyLink™ modular wiring system. Plug and play power is UL and CUL listed. Each Villa™ serves two users with data and power. Flush lid design with brush trim. Brushed aluminum finish.

Nesta™ table widths are sized for DaisyLink™ Modular Wiring

DaisyLink™ permits fast deployment and storage. Supports laptops in the classroom with glitch-free power distribution. No more dead batteries!
Nesta™ Laptop Tables may be purchased without the Villa™ power/data ports and DaisyLink™ modular wiring system, so that you may receive the flexibility and storage benefits of the table when power and data wiring are not required.
NSF-362628-VFS
Nesta™ Table with Villa™ & DaisyLink™
36" w x 26" d x 28" h
NSF-362628-xxx [table only without Villa]

NSF-722628-VFS
Nesta™ Table with Villa™ & DaisyLink™
72" w x 26" d x 28" h
NSF-722628-xxx [table only without Villa]

Nesta™ Laptop Tables simply plug together. Your classrooms will be pre-wired for the Villa™ and DaisyLink™ modular wiring system, so power cables just plug in and tables connect together.

DaisyLink™ Modular Wiring conducts power from your installed wall outlet to a row of tables. Room layout drives electrical service specifications. We collaborate to deliver an engineered, plug & play solution.

Data cables are routed separately, but connect at the same locations as power.

1" x 3" J-style wire management channel (standard)
