

The Island is an octagonal shaped, stationary grommet ideal for round table applications. Made of powder coated steel, the Island is designed to be more durable than traditional plastic products. The Island is provided with 4 power or 2 power and 2 data configurations. It fits into a standard 3" diameter grommet cutout making retrofitting older products easy and convenient.

## Installation Instructions

- Drill a 3" diameter hole through table (max thickness 1.75").
- Insert Island from top as shown.
- Clamp Island in place with clamp provided.
- Plug Island and make data connection as needed.

### TABLE CUTOUT SIZES

Cutout	=	3" round
Minimum Thickness	=	None
Maximum Thickness	=	1.75"
