

# FP SERIES WORKSTATIONS

SEMI-RECESSED LCD MONITOR CONFIGURATION

## Semi-Recessed Monitors are the ideal solution for independent CBT.

Because the monitor is also in the visual plane of the work surface, students are comfortable in any position - making long sessions, shared computers and tutoring easier and noticeably boosting visual perception and the level of concentration.

The FP Series, like the SMARTdesks™ SR Desk, positions the monitor within the students field of view but below the horizon line providing an unobstructed line-of-sight between student and instructor.

The standard FP desk accommodates 15" to 19" flat panel displays and allows positioning of the screen at the ergonomically correct height, angle and distance for all types of Computer-Based Training (CBT).

Two standard depths both available with and without keyboard pullouts allow you to design the classroom for maximum density and maximum workspace.

SMARTdesks™ SR workstations offer plenty of legroom and 28" wide pull-out keyboard/mouse platforms with full-extension ball-bearing slides that are sturdy enough to lean on. The desks are designed to conceal and protect all the wires that protrude from the back of the CRT and are the source of the cable clutter that seems to haunt most computer labs.

Our product numbers have meaning:

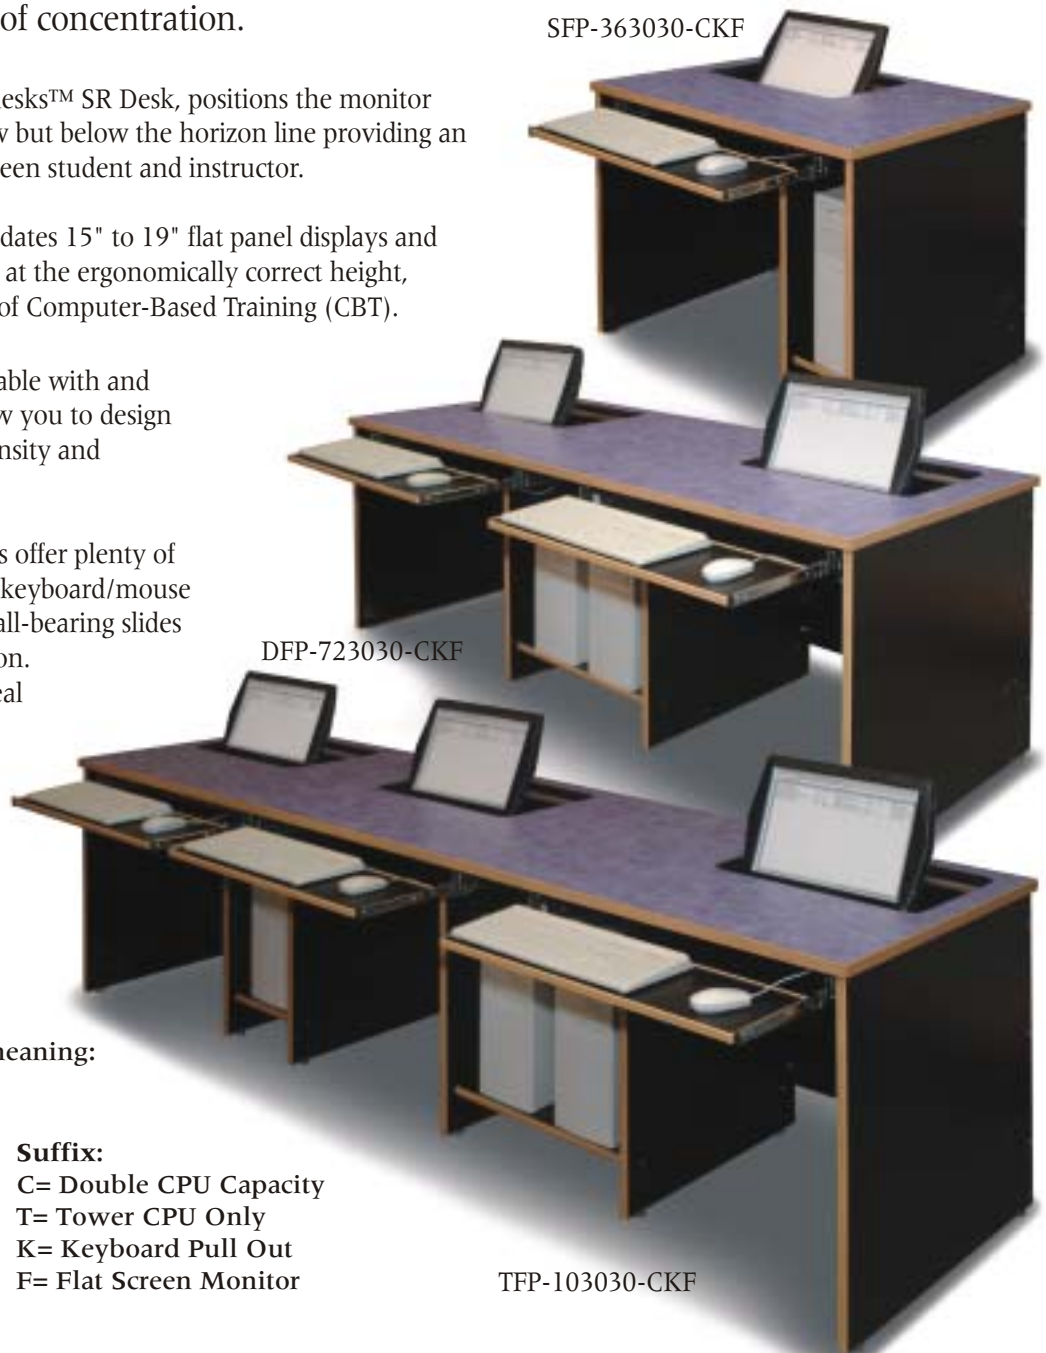

SFP-603630-CKF

Prefix:	Dimensions:	Suffix:
Single	Width= 60"	C= Double CPU Capacity
Double or	Depth= 36"	T= Tower CPU Only
Triple	Height= 30"	K= Keyboard Pull Out
Flat		F= Flat Screen Monitor
Panel
