Comfortable, award-winning designer styling. Innovative solution to space planning!

Make the most of Multi-Use space. In minutes, convert a lecture hall seating 60 to a testing center, laptop classroom or writing lab with chairs and desks for 30. Store all of the furniture on four trolleys in 30 square feet.

Contoured for comfort, attractive molded plywood seats are durable and maintenance free. Generous (21" wide) seat and back insure every student has plenty of "personal space" and room to work. Steel frames are shaped to position each seat so adjacent arms don't pinch and elbows don't "rub." Soft rubber arm cap cushions also function as spacers to protect finish when stacked.

Thoughtful design, robust hardware and quality materials assure long lasting, trouble-free performance. The award-winning SeatTable® is very easy to use and requires minimal effort to convert from chair to table to chair. Sled bases offer the maximum in strength and usability.

Up to 12 SeatTable® chairs stack on trolley for easy transport. Trolley model number : ST-SC-HC

Standard legs are steel with aluminum finish. Chromium finish is available.
