

LONGITUDES[®]

A modular, scalable computer conference table system customized to set the tone for each space.

shaping conferencing and educationsm

The matrix of possibilities for Longitudes is endless. Offered in rectangular, racetrack and arched ends, segments are constructed in workstation modules of four, five, six and seven. This allows Longitudes to be scaled perfectly to your conference space.

Workstations may be flipIT® for LCDs or flipIT Laptop Safe®. Conference table lengths are engineered to vary to accommodate the flipIT dimensions specified.

For finishes, choose from a range of handsome, long-wearing high pressure woodgrain laminates with stained hardwood edge molding.

LNG-60308-REC3-FK20 is rectangular, dimensioned 60 x 308 inches and seats 20 at flipIT L18 Laptops Safe workstations.

LNG-60224-RTX2-FK14 has racetrack ends, dimensioned 60 x 224 inches and seats 14 at flipIT L18 Laptops Safe workstations.

LNG-60168-ARC2-FK10 has arched ends, dimensioned 60 x 168 inches and seats 10 at flipIT L18 Laptops Safe workstations. LNG-6084-ARC1-FK4 seats 4.

Steel Structure

Designed for wire management and superior rigidity

Robust 14 gauge steel construction

Cantilever supports give clear spans for maximum comfort in use.

Power and data routed from floor through large capacity cable ways to wire management keel

Bases sculpted for Connectrac® compatibility

I-beam keel structure is scaled to support four, five and six workstation tops to make tables of any length.

Easy access to cable and small components stored in keel

Keel provides huge cable management capacity

LONGITUDES[®] Longitudes may be outfitted with flipIT[®] Laptop Safes or flipIT[®] Convertible Workstations as options. The flipIT[®] products are sized for popular technology choices. Discuss your needs and we will engineer to suit.

Visit us online and request a fully engineered, configured solution. You will receive a floor plan detailed with the Longitudes table options you require for your communication space, including Connectrac[®] for routing power and data, if this is an option you are also considering.
